

Macy's Pride™ Rose
Rosa 'BAIcream'

Height: 4 feet

Spread: 4 feet

Sunlight: ○

Hardiness Zone: 4

Group/Class: Easy Elegance Rose

Description:

A delightful shrub covered with delicate double white blooms that will do wonders to accent any garden; very easy to grow and adapts well to different conditions, a highly recommended selection

Ornamental Features

Macy's Pride Rose is smothered in stunning fragrant white flowers at the ends of the branches from late spring to mid fall, which emerge from distinctive yellow flower buds. The flowers are excellent for cutting. It has green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color. The fruits are showy red hips displayed in late fall.

Landscape Attributes

Macy's Pride Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Macy's Pride Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Macy's Pride Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
